

A letter of recommendation for  
DR. KLAUS SCUSTEREDER

To whom it may concern

I know Dr. Klaus Schustereder since Mai 2018. He has worked several years in a hospital in Central African Republic. Dr. Schustereder is a passionate clinician. His observations in the field of epidemic medicine are very valuable. The conversations we are having since 2018 were very inspiring to me. I very much appreciate the human values of Dr. Schustereder and his humanitarian work in Africa. He is an innovate thinker in the field of medicine. His ideas in the field of epidemic disease can be helpful for many people suffering from disease like Malaria, HIV/AIDS, hepatitis, Diabetes and Sickle Cell Anemia.

I wish him all the best for her personal life and career.
